

CERTIFICATE OF COMPLETION

This certificate is awarded to

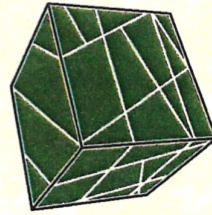

Jerjes Porlles

For successfully completing 20 hours of *3DEC* Introductory Training April 2022.

This course provided an overview of the capabilities and features in 3DEC and covers software fundamentals with discussions on the theoretical background, basic concepts, and modeling principles for geotechnical analysis, mining, and petroleum engineering. Including model building, application of initial and boundary conditions, constitutive (material) models, as well as solving, monitoring, and visualizing results.
